DETAILED ACTION

- 1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference character not mentioned in the description: 39 in Fig. 5.

 Corrected drawing sheets in compliance with 37 CFR 1.121(d), or amendment to the specification to add the reference character(s) in the description in compliance with 37 CFR 1.121(b) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.
- 2. The disclosure is objected to because of the following informalities:

Paragraph 1, line 3, the related application is not identified by Serial No. and filing date.

Paragraph 34, lines 5-6, "they deflect the sum of the forces" is unclear. It should be changed to --it deflects in response to the sum of the forces--.

Appropriate correction is required.

3. Claim 11 is objected to because of the following informality: there is no antecedent basis for "said digital word" in line 2. Claim 11 should depend upon claim 10. Appropriate correction is required.

Application/Control Number: 10/604,232 Page 3

Art Unit: 2856

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 17 and 18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 17, it is not clear what is meant by the first bridge accelerometer being "on" a first plate. Rather, the first bridge accelerometer 15 in Fig. 5 comprises several plates (31, 32, 34, 60, 62, 62) and does not appear to be "on" any particular plate.

Regarding claim 18, it is not clear that any plate (31, 32, 34, 60, 62, 62) "faces a yz, xz, or yx plane." Such description does not appear in the specification. Furthermore, it would appear to be necessary that the flexure plate 33 be located in the xz plane in Fig. 2 in order that the flex axis be perpendicular to the stability (y) axis, as recited in claim 13, lines 8-9.

- 6. Claims 1-10 and 12-16 are allowed.
- 7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Watson discloses an inertial platform accelerometer cluster comprising an accelerometer pair 15x, 15x' for measuring angular acceleration about the y-axis in Fig. 1. Kulmaczewski discloses an inertial measurement unit for measuring angular acceleration using only fixed linear accelerometer sensors. Algrain discloses a method and apparatus for platform stabilization comprising linear accelerometer groups 44, 46, 48 and 50 to calculate the angular

accelerations of the mounting base 27. Campbell et al. discloses a variable capacitance bridge accelerometer.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to John E Chapman whose telephone number is (571) 272-2191. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Hezron Williams can be reached on (571) 272-2208. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
